<p>Significant learning:</p> <p>The visit to the company was a great experience for automobile enthusiasts like us. We had a good journey, had good refreshments and overall the site visit was very informative.</p> <p>We were systematically taken through the factory visit by firstly presenting the students with a video presentation regarding the company's history and present ventures. This presentation gave us the spirit of curiosity to undergo the practical visit inside the maramalai nagar plant. Secondly, we had been provided with refreshments during the 10 min. break. Finally, two engineers divided the entire batch of 31 student members into two groups for the department-wise visit of the plant.</p> <p>We were explained by the particular group guide that there were three departments namely PDC (Pressure Die Casting) dept., Machine shop and the Assembly dept. The department-wise visit gave us the detailed view of the stages undertaken for the production of two-wheeler carburetors (two types VM and BS) and four wheeler MPFI delivery pipes. The practical knowledge gained for the theoretical knowledge studied in the classrooms was very much encouraging.</p> <p>Since we had an overall view of the factory, the knowledge delivered by the dedicated engineers wasn't grasped easily by many students, so we would suggest that the duration be increased and also the factory was a little congested or in short of space to comfortably view the working of all the machines and its processes. If concentration is given towards this feedback we feel it would enhance our acquired knowledge and the effectiveness of the factory visit to the forthcoming companies in near future to a greater extent. But the sort of hospitality provided by the factory employees was truly commendable. We extend our kind regards to the company for the knowledge imparted by spending their valuable time for we student members.</p>
