INTERNATIONAL CONFERENCE

on

ADVANCES IN DESIGN, MATERIALS, MANUFACTURING AND SURFACE ENGINEERING FOR MOBILITY

7th & 8th February 2025,

FREE
*for all Professional Members
of SAEINDIA

SCOPUS
Indexed
Q3 Category Journal by SJR

Developments in design, manufacturing processes and newer materials greatly influence the world economy. Global competition has forced the manufacturing industries to deliver the products and services of high quality, at low cost in short lead time in a sustainable way. The objective of this conference is to provide an interdisciplinary forum for leading professionals, academicians and researchers engaged in the spectrum of research and development to discuss recent advancements, research findings and exchange of experiences relevant to automotive systems and its applications.

Date	Event	Membership
6 Feb 2025	Industry Visit	Professional
7 - 8 Feb 2025	Paper Publication & Presentation	Professional, Student PG & Research Scholar
